

## Intro

My application is an app that i've wanted to exist since forever. Similar websites exist, but none are available on the apple or google play storefronts. Right now im calling it GameTrack+, which is an homage to the app that inspired it. Think of an application like letterboxd, but for video games. It would allow users to write reviews for their favorite games, keep a public profile of their game collection, and view other users reviews for advice on games to play.

## Jet Set Radio Future

Xbox

“Jet Set Radio Future is a great collectathon with a colorful cast of interesting characters and over the top charm. Shame it’s almost impossible to play it in 2023... 5 stars!”

*reviewed by @username01*

## Kingdom Hearts II

Playstation 2

“Kingdom Hearts 2 was one of my favorites growing up, but coming back to it as an adult changed my perspective on it. It’s just too easy! Thats the only thing that keeps it from 5 stars for me...”
